## Medicaid Services

Louisiana's Medicaid program covers many of the same things that private health insurance programs traditionally cover. Medicaid can also cover services to help "fill in the gaps" in Medicare and meet certain long-term care needs.

The list below includes things Louisiana Medicaid will cover in some or all cases. Some services are only offered to Medicaid recipients because of their age, family situation, transfer of resource requirements or other living arrangements. Also, some services are limited. If you click on a service listed on this page, you can find out:

**There are special benefits for children and youth with developmental disabilities.**

[Learn more about benefits](#)

[Locate services](#)

- **How** to get the service
- **Who** can have the service
- **What** is included in the service
- **Any** other important information about the service
- **Where** to call if you have questions about the service

Before you receive a service, you should ask your doctor or provider about limits to receiving the service or if the service needs to be "prior authorized." ("Prior authorized" means Medicaid has to agree to pay for the service before it can be offered to a patient.)

Just because a service is not on the list does not mean that Medicaid will not cover it. Call the contact listed for the service group in question if a service is not listed.

\*You may appeal a Medicaid decision if all the services you requested were denied, if part of the services you requested were denied, if you were offered different services than you requested or if the service provider did not submit for full amount of services you requested.

### How to Appeal Medicaid

 Listed below are some aids we hope will help you understand this fee schedule. If, after reading the information below, you need further clarification of an item, please call Gainwell Technologies Provider Relations at 1-800-473-2783.  
 -----

COLUMN 1. TS (Type Service): Definition: Files on which codes are loaded and from which claims are paid. The file to which a claim goes for pricing is determined by, among other things, the type of provider who is billing and by the modifier appended to the procedure code.

Listed below is an explanation of the type of service found on this schedule.

39 - State Hospitals Outpatient Services

20 - Enhanced Outpatient Rehab Services (under age 3)

COLUMNS 2, 3 and 4. CODE, DESCRIPTION and FEE: All revenue (HR) codes will require a valid procedure code (HCPC or CPT). All revenue codes will be reimbursed based on the Hospital Specific Cost-to-Charge Ratio except for Labs, Outpatient Services (Therapies), and Hospital Outpatient Clinic Visits will be paid based on the procedure code fee.

NOTE: Hospital Outpatient Ambulatory Surgery (490) fees are listed under a separate web based Fee Schedule.

COLUMN 5. AGE MIN and MAX: Codes with minimum or maximum age restrictions. If the recipient's age on the date of service is outside the minimum or maximum age, claims will deny.

COLUMN 6. PA (Prior Authorization): Some services must be prior authorized before they are rendered. If a PA request is approved, a PA number will be issued for inclusion on the claim. If a PA request is not approved, no payment for the service will be made.

COLUMN 7. MED REV: Claims with some codes pend to Medical Review for review of the attachments or to confirm Prior Authorization by the surgeon.

COLUMN 8. SEX (Restriction): Some procedure codes are restricted to a particular sex.

COLUMN 9. UVS>001: An 'X' in this column means more than one unit of service per day may be billed.

COLUMN 10. Effective date: Type of Service (TOS) 39 was created 7/1/08 specifically for State Hospitals Outpatient Services. As the HCPC codes are updated annually, the effective date and fee of a specific code will change if affected.

COLUMN 11. X-OVERS (Only): These codes are payable for Medicare/Medicaid recipients only.

COLUMN 12. SPEC IND: This code is associated with a special process.

Code E - Medicaid Expansion

PAGE:

-----  
 Listed below are some aids we hope will help you understand this fee schedule. If, after reading the information below, you need further clarification of an item, please call Gainwell Technologies Provider Relations at 1-800-473-2783.  
 -----

COLUMN 1. TS (Type Service): Definition: Files on which codes are loaded and from which claims are paid. The file to which a claim goes for pricing is determined by, among other things, the type of provider who is billing and by the modifier appended to the procedure code.

Listed below is an explanation of the type of service found on this schedule.

37 - Small Rural Hospital Services

20 - Enhanced Outpatient Rehab Services (under age 3)

COLUMNS 2, 3 and 4. CODE, DESCRIPTION and FEE: All revenue (HR) codes will require a valid procedure code (HCPC or CPT). All revenue codes will be reimbursed based on the Hospital Specific Cost-to-Charge Ratio except for Labs, Outpatient Services (Therapies), and Hospital Outpatient Clinic Visits will be paid based on the procedure code fee.

NOTE: Hospital Outpatient Ambulatory Surgery (490) fees are listed under a separate web based Fee Schedule.

COLUMN 5. AGE MIN and MAX: Codes with minimum or maximum age restrictions. If the recipient's age on the date of service is outside the minimum or maximum age, claims will deny.

COLUMN 6. PA (Prior Authorization): Some services must be prior authorized before they are rendered. If a PA request is approved, a PA number will be issued for inclusion on the claim. If a PA request is not approved, no payment for the service will be made.

COLUMN 7. MED REV: Claims with some codes pend to Medical Review for review of the attachments or to confirm Prior Authorization by the surgeon.

COLUMN 8. SEX (Restriction): Some procedure codes are restricted to a particular sex.

COLUMN 9. UVS>001: An 'X' in this column means more than one unit of service per day may be billed.

COLUMN 10. Effective date: Type of Service (TOS) 37 was created 7/1/08 specifically for Small Rural Hospital Outpatient Services. As the HCPC codes are updated annually, the effective date and fee of a specific code will change if affected.

COLUMN 11. X-OVERS (Only): These codes are payable for Medicare/Medicaid recipients only.

COLUMN 12. SPEC IND: This code is associated with a special process.

Code E - Medicaid Expansion

# California Passes Bill Allowing Omission of Patients' Names From Abortion Pill Bottles

The intent is to protect health care providers who send the pills to patients in states with abortion bans, and to reassure patients who fear they could be identified.

Sept. 11, 2025

California legislators have passed one of the strongest measures so far to protect health care providers who send abortion pills to states with abortion bans and the patients who receive them.

The bill, approved by wide margins in the State Assembly Wednesday night and the Senate Tuesday, is expected to be signed by Gov. Gavin Newsom. It would allow health care providers to mail abortion pills with only a minimum of identifying information: Medication labels and paperwork in the packages could omit the name of the patient, prescriber and pharmacist. The legislation is expected to have broad national impact because a majority of medication abortion services across the country use pharmacies based in California to dispense and ship the medication.

The measure is intended to make it harder for states with abortion bans to develop evidence to make legal cases against doctors and others operating under shield laws that were adopted by many states to protect abortion pill prescribers after the Supreme Court revoked the national right to abortion. It is also intended to

reassure women in states with bans who seek abortions and who may be afraid to obtain prescription pills, fearing they could be identified by the authorities if their name is on the bottle.

The abortion shield laws in at least eight states prevent officials from obeying subpoenas, extradition requests and other legal actions that states with bans take against abortion providers. That is a stark departure from typical interstate practices of cooperating in legal matters.

James Bopp Jr., the general counsel for National Right to Life, called legislation to strengthen shield laws “almost horrifying.” He said the California bill would result in “no accountability for abortion drugs or the people that prescribed them,” adding “even if you find the doctor, they could say, ‘Well I didn’t prescribe those pills.’ How are you going to prove that the pills she took in this box with no names on it were the ones that he prescribed?”

Shield-law providers have become a major avenue of abortion access for women in states with bans, currently serving an estimated 12,000 patients per month — about one-eighth of all abortion patients in America. As use of shield-law providers has grown, abortion opponents in states with bans have begun filing civil lawsuits and criminal charges, with at least one case — a showdown between Texas and New York — poised to become a constitutional contest likely to reach the Supreme Court.

In response to the escalating legal actions, several states, including New York, Washington and Massachusetts, recently passed measures to allow prescribers to send abortion pills with only the name of their medical practice on the medication packages, not their individual names. But because many providers in those states use California pharmacies to ship the medication, they have had to follow California’s requirement that the prescriber’s name be on the bottle.

That would change under the new bill. “Because California is such a hub for this, we needed to take it a step further,” said Jessica Nouhavandi, a California pharmacist who advised on the legislation. “Protecting just one piece of the puzzle wasn’t enough.”

Pharmacists and prescribers would continue to be required to keep records with the patient's name and all other information typically required for prescription medication, she said, but the bill would allow abortion patients to receive a "bare bones" label with the name of the drug, directions for appropriate use and a phone number to call for any questions.

Removing the abortion patient's name from anything in the package the patient receives is especially significant, said Natalie Birnbaum, the state legal and policy director for the Reproductive Health Initiative for Telehealth Equity and Solutions, who helped craft the California bill.

"It's clear that having a patient's name on their label for abortion medication is preventing people from getting the care that they need," she said. Even though state abortion bans currently exempt the patients themselves from prosecution or penalty, "there is confusion, there is fear, there is an increasing abortion stigma," she added.

Ameet Sarpatwari, an assistant professor of medicine at Harvard Medical School, said that "patient names have historically been on prescriptions and packaging to safeguard safety and prevent misuse and abuse." But, he said, given that the California bill is limited to abortion medication, and that many studies have shown that abortion pills are safe, the California measure "doesn't really raise fears."

Brigid Groves, vice president of professional affairs for the American Pharmacists Association, said that in general, giving patients medications without their name on it raises concerns about "making sure that the right patient at the right time is getting that."

But she said her organization did not take a position on the California bill. "The concern is, if we start this process or this exclusion for one class of medications, how far does that go?" she said. But, with abortion pills, she said, "I understand wanting to make sure that in this case, people aren't being targeted or going to have other repercussions because of the medication they've been prescribed."

Republican Texas Gov. Greg Abbott has signed a first-of-its-kind law that lets anyone sue prescribers and others responsible for getting abortion pills into the state.

Supporters are heralding the law, which Abbott signed Wednesday, as a way to enforce an existing ban. Abortion-rights advocates are bashing the law, saying it has the potential to turn abortion opponents, aggrieved former lovers and others into bounty hunters.

But it doesn't mean that organizations will stop sending pills into Texas.

Advertisement

Angel Foster, who runs Massachusetts-based The MAP, which prescribes the regimen of pills to women in every state, said her organization will keep sending pills to women in Texas, as it has about 10,000 times in the past two years.

"We really don't change things unless we're legally required to," she said.

Rebecca Nall, the founder of I Need an A, which runs a website with abortion access information, suggested other providers also won't change.

"We're confident people in Texas (and every state) will still be able to get abortion pills by mail," she said in an email.

## **Pills are at the heart of a new generation of abortion lawsuits**

The majority of abortions in the U.S. employ pills, usually a combination of the drugs misoprostol and mifepristone.

Since the U.S. Supreme Court overturned Roe v. Wade in 2022 and allowed states to enforce abortion bans, the method has moved to the center of the latest legal and political battles.

At least eight Democratic-controlled states have adopted shield laws that seek to protect medical professionals in their borders who prescribe the pills via telehealth and send them to patients in states where abortion or telehealth pill prescriptions are banned.

Advertisement

Those prescriptions are a key reason that the number of abortions has not fallen despite 12 states enforcing bans on abortion at all stages of pregnancy, with limited exceptions, and four more barring it after about six weeks of gestation.

## **The Texas law allows \$100,000 claims against prescribers and others**

The Texas law, which is to take effect in three months, builds on an approach the state used when it implemented an earlier abortion ban: leaving enforcement to private people filing lawsuits rather than the government.

Under this measure, anyone could file a claim for \$100,000 against people who cause the pills to be sent to Texas.

If a pregnant woman, the man who impregnated her or other close relatives sue successfully, they could be entitled to collect the entire \$100,000. Others who sue would be in line for \$10,000 — with the other \$90,000 going to charity.

The law also answers a provision of shield laws that allows protected prescribers to sue those who sue them. The Texas law says that would not apply for the civil suits that originate there.

Advertisement

## **One provider says her group won't be deterred**

The Abortion Coalition for Telemedicine, which provides legal and other support for abortion pill prescribers, is telling members that the shield laws should protect them from civil suits from Texas, said McKensy Smith, the group's deputy director.

Texas, the nation's second most populous state, accounts for about one-third of the pills The MAP prescribes.

Foster said that she expects other prescribers to keep sending the pills to Texas, too.

She still anticipates the law will have an impact: Women seeking abortion in Texas could stop telling others that they are planning to seek pills from out-of-state providers lest those confidants use the information to launch lawsuits.

One of the effects will be to isolate abortion patients in Texas, Foster said.

Advertisement

### Pill access is facing other court challenges

Mary Ziegler, a law professor at the University of California, Davis, said she expects that people sued under the Texas law will make their own court claims, arguing that it is not enforceable.

"The drug manufacturers and the providers are all willing to take the risk that the shield laws will protect them," she said.

She said the result could be individual court decisions on whether the Texas law applies in certain circumstances rather than one sweeping ruling.

Those suits won't be the first legal test around abortion pills, though.

Last month, Texas and Florida asked a court if they could join a lawsuit filed by the attorneys general of Idaho, Kansas and Missouri that seeks to have some federal approvals for mifepristone rolled back — and possibly blocking telehealth prescriptions for it.

## Blue-state doctors launch abortion pill pipeline into states with bans

At least 3,500 doses have been shipped to antiabortion states since mid-June, a process enabled by new shield laws

July 19, 2023

 11 min             2786

A doctor reviews mailing labels as she prepares to ship abortion pills from her home in New York's Hudson Valley. (Nadia Sablin for The Washington Post)

By Caroline Kitchener

The doctor starts each day with a list of addresses and a label maker.

Sitting in her basement in New York's Hudson Valley, next to her grown children's old bunk beds, she reviews the list of towns and cities she'll be mailing to that day: Baton Rouge, Tucson, Houston.

A month ago, a phone call was the only thing the doctor could offer to women in states with abortion bans who faced unexpected pregnancies. Hamstrung by the laws, she could only coach them through the process of taking abortion pills they received from overseas suppliers.

---

Advertisement

Then, all of a sudden, the whole system changed. Now she can legally mail them pills herself.

A new procedure adopted in mid-June by one of the largest abortion pill suppliers, Europe-based Aid Access, allows U.S. medical professionals in certain Democratic-led states that have passed abortion “shield” laws to prescribe and mail pills directly to patients in antiabortion states.

The Hudson Valley doctor works from a makeshift office set up in the basement of her home. (Nadia Sablin for The Washington Post)

Previously, Aid Access allowed only Europe-based doctors to prescribe abortion pills to women in states where abortion is restricted and then shipped those pills internationally, leaving patients to wait weeks. The telemedicine shield laws, enacted over the past year in New York, Massachusetts, Washington, Vermont and Colorado, explicitly protect abortion providers who mail pills to restricted states from inside their borders.

The result is a new pipeline of legally prescribed abortion pills flowing into states with abortion bans. In less than a month, seven U.S.-based providers affiliated with Aid Access — including the Hudson Valley doctor, who spoke on the condition of anonymity because she was concerned for her safety — have

mailed 3,500 doses of abortion pills to people in antiabortion states, according to Aid Access, putting just this small group alone on track to help facilitate at least 42,000 abortions in restricted states over the next year. If more doctors and nurses sign up, as current providers hope they will, the numbers could climb far higher.

---

**Follow** Politics

“Everything I’m doing is completely legal,” the Hudson Valley doctor said, her family’s ping-pong table covered with abortion pills bound for the South and Midwest, where abortion has been largely illegal since the Supreme Court overturned *Roe v. Wade* in June 2022.

“Texas might say I’m breaking their laws, but I don’t live in Texas.”

---

Advertisement

The development tees up a complicated interstate battle where doctors on U.S. soil are empowered to legally circumvent abortion laws — allowing blue states to potentially undermine the red state bans that many Republicans hoped would end abortion within their borders. Meanwhile, some conservative groups are angling to outlaw the abortion pill nationwide, attempting to outlaw the medication in the courts as well as calling for a national abortion ban.

The increasing flow of prescribed pills adds to an already expanding underground network for pills being imported from overseas and illegally

distributed by abortion rights advocates largely without medical oversight, underscoring the prominent role pills are playing in post-*Roe* America.

The shield laws are “a huge breakthrough for people who need abortions in banned states,” said David Cohen, a Drexel University law professor who focuses on abortion legislation. “Providers are protected in many ways as long as they remain in the state with the shield law.”

Bottles of misoprostol and boxes of mifepristone sit on a ping-pong table, waiting to be mailed to patients. (Nadia Sablin for The Washington Post)

The doctor prepares packages containing abortion medication to mail out from her home. (Nadia Sablin for The Washington Post)

Some lawyers say these doctors could face repercussions, even if they steer clear of traveling to states in which abortion bans call for prosecuting abortion

providers. At a minimum, some experts said, the question of legal peril could wind up in a gray area ultimately resolved by the courts, such as whether shield law states have the power to block other states from extraditing people charged with crimes.

Major groups that support abortion rights, including Planned Parenthood and the American College of Obstetricians and Gynecologists (ACOG), have been largely silent on the subject of mailing pills from shield law states. Several Aid Access providers say the groups have expressed concern about backing the approach, worried that providers could put themselves at risk.

Molly Meegan, the ACOG's general counsel and chief legal officer, said the group is "not positioned to provide legal advice to individual members," adding that "it is wrong for a state to be able to prosecute clinicians and patients in other states where abortion remains legal and unrestricted." Planned Parenthood issued a statement saying that its advocacy arm was "doing everything possible, and looking into every opportunity, to ensure that patients can access care no matter where they live."

Jonathan Mitchell, the former solicitor general of Texas and architect of the state's six-week abortion ban, said it was too early to predict how these shield laws would play out, but said the providers may face consequences.

"There absolutely is a world in which they could get in trouble for it," he said. "Someone in Texas could do a sting operation and charge them with attempted murder."

In many states, including Texas, someone found guilty of distributing abortion pills could be sentenced to at least several years in prison. Current abortion bans explicitly exempt those seeking abortions from prosecution, though prosecutors have a history of charging people who have abortions with other crimes.

A volunteer folds guides to mail with abortion pills. (Nadia Sablin for The Washington Post)

The Hudson Valley doctor said she's not worried about her own legal risk. When she arrives at the post office with dozens of new packages every afternoon, she said, no one ever asks any questions.

"Nobody has any idea. I could be doing so many different mailer businesses from home," she said. "It could be beaded necklaces. It could be soaps. It could be candy."

Massachusetts passed the first telemedicine abortion shield law of its kind just days after *Roe v. Wade* was overturned. The most recent law passed in New York in mid-June.

The New York law specifies that no state or local government employee "shall cooperate with or provide information to any individual or out-of-state agency or department regarding any legally protected health activity in this state."

---

Advertisement

---

With shield laws, abortion rights advocates have seized an opportunity to “define the landscape,” said Julie F. Kay, a human rights lawyer and the legal director of the Abortion Coalition for Telemedicine Access. One key question that could emerge in the coming months is whether prosecutors in any antiabortion states would attempt to extradite medical providers from shield law states, thereby challenging the power of the new laws.

Kay said that traditional extradition laws would be difficult to apply in these circumstances.

“One state can extradite if a person commits the crime in the state, then flees,” Kay said. “But no one is fleeing here. You are just sitting in your office in New York.”

Aid Access started sending abortion pills to women in the United States long before the June 2022 Supreme Court ruling. The service, which costs \$150 or less, is far cheaper than having a surgical abortion or obtaining medication at a clinic — usually between \$500 and \$800 — making it an appealing option even to people in states where abortion is readily accessible.

Once *Roe* fell, the organization operated in a legal gray area, shipping pills to antiabortion states from India. Aid Access providers mail pills sealed in clearly marked boxes, setting the organization apart from many other overseas pills suppliers, which send pills without a prescription, sometimes unmarked and

The doctor carries two boxes full of packages of abortion medication up from the basement of her home to her car. (Nadia Sablin for The Washington Post)

Demand for pills from Aid Access has soared since the June 2022 Supreme Court ruling, with the organization receiving almost 60 percent more requests for pills this spring than in the months immediately following the decision, according to Abigail Aiken, lead investigator of the Self-managed Abortion Needs Assessment Project at the University of Texas at Austin. People seeking an abortion often find the group online, then make their request through its website. The request gets forwarded to one of the providers.

U.S.-based Aid Access providers were used to the process of receiving and processing requests for abortion pills, accustomed to working with patients in states where abortion is legal — but the process of ordering the medication and mailing it out was far less familiar.

The providers order mifepristone and misoprostol — the pills in a two-step medication abortion regimen — from licensed pill distributors, and ship out the pills to patients fairly quickly along with detailed instructions.

---

Advertisement

Before the recent change in procedure, the Aid Access providers would send all of their prescriptions to an online pharmacy in California to handle shipping, one of two online pharmacies nationwide that dispenses abortion pills. But neither of those pharmacies is located in a state with a shield law. Until California passes one, a development that is expected this fall, the doctors have to prepare and package the pills bound for restricted states themselves, creating their own labels to stick on the pill boxes they receive, providers said. (Doctors are legally permitted to order and distribute pills on their own, the providers said — it's just not typical.)

“We’re medical providers suddenly thrown into this world of shipping,” said Lauren Jacobson, a nurse practitioner who operates out of Massachusetts. “Do we write labels by hand? What if we mess up an address? How on earth do we ship 50 packages a day?”

Jacobson concedes that this system is far from perfect. While medication abortion is overwhelmingly safe and effective, she said, on rare occasions her patients in restricted states require in-person care — and they fear the legal risk that could come with a trip to the hospital. In those cases, she said, she will try to help them navigate their state’s health-care system safely, searching online for a trustworthy provider and advising them on what to say. Sometimes, she said, she’ll go on LinkedIn and scope out the local OB/GYNs, searching for someone who has posted something that supports abortion rights.

“This isn’t normal health care,” she said. “We don’t want to have to do this.”

Providers also recognize that many patients prefer or require a surgical procedure to end their pregnancy instead of pills.

One major impetus for Aid Access changing its protocol was the shipping time, said Linda Prine, an Aid Access provider and doctor based in New York. Patients would have to wait weeks for pills shipped from India, she said, often pushing their abortions well into the second trimester — a far more difficult and complicated process. (The U.S. Food and Drug Administration endorses the use of abortion pills up to 10 weeks, though some studies show it's safe and effective to use them significantly later in pregnancy.)

"They were having a really scary miserable experience," Prine said, with some far enough along that they would pass a recognizable fetus.

Prine founded the Miscarriage and Abortion Hotline, where people often call with questions about medication abortion. Since Aid Access's protocol change, she said, she has noticed a significant decrease in calls from women who are taking pills in their second trimester.

Eventually, the Aid Access providers fully expect Republicans to take a swing at their efforts.

“We’re all like, ‘Okay which one of us is going to be the case?’” said the doctor in the Hudson Valley. “It’s not if there will be lawsuits, it’s when.”

Jacobson said she trusts the Massachusetts courts to protect her.

“We have seven American providers who are stepping in and saying, ‘You know what, we’re not going to be intimidated,’” Jacobson said.

The providers are eagerly waiting for the shield law to pass in California.

Once that passes, the Hudson Valley doctor may no longer have to run a complex shipping operation from her basement. She’ll likely be able to send her prescriptions to the pharmacy, just like she used to, she said.

For now, she said, she doesn’t mind staying up until 1 a.m. to finish the packing.

“It feels like I’m giving a big middle finger to that part of the country that has

## U.S. abortion access, reproductive rights

**Tracking abortion access in the United States:** Since the [Supreme Court struck down \*Roe v. Wade\*](#), the legality of abortion has been left to individual states. The Washington Post is tracking [states where abortion is legal, banned or under threat](#).
